

Bright Tv Viewership Analysis presentation

Presented by: Toy
Mogohlwane

project overview

PROJECT OVERVIEW

The purpose of this project was to analyse Bright TV viewership data and identify important patterns in audience behaviour.

The analysis focuses on:

- Audience demographics
- Regional viewership
- TV channel performance
- Viewing behaviour
- Viewership trends over time

The dashboard was designed to provide an interactive and easy-to-understand overview of Bright TV's audience.

key performance indicators

BRIGHT TV PERFORMANCE OVERVIEW

- Total Views: 10K
- Total Viewers: 4,386
- Total Watch Time: 1,340
- TV Channels: 17

These KPIs provide a high-level overview of Bright TV's overall audience reach and viewing activity.

Audience Insights

AUDIENCE INSIGHTS

- The audience analysis examines viewership according to age group and gender.
- Young Adults recorded the highest viewership among the age groups shown on the dashboard.
- The gender analysis provides a comparison of viewership across male (8.76k), female (977) and unknown (262) viewer categories.

KEY INSIGHT:

Young Adults represent an important audience segment for Bright TV.

Watch Time by Region

- Some regions generate significantly higher watch time than others
- showing where Bright TV has stronger viewer engagement.
- Gauteng has the highest watch time (1,166) (100%)
- Northern Cape has the lowest watch time of (209) (17.92%)

Viewership by Time of Day

Record Count

- The analysis shows how Bright TV viewership changes across different times of the day.
- Viewership increases throughout the day, with Evening recording the highest number of viewers.
- Morning and Afternoon also show strong audience activity compared to Midnight.

KEY INSIGHT:

Evening is the peak viewing period for Bright TV, while Midnight records the lowest viewership.

RECOMMENDATION:

Bright TV should consider scheduling popular and high-engagement content during evening hours to reach a larger audience.

Watch Time by Ethnicity

This analysis compares the amount of watch time generated by different ethnic groups.

- The Black audience records the highest watch time, followed by the Coloured and Indian/Asian groups.
- The White group records slightly lower watch time, while the Unknown category has the lowest watch time.

KEY INSIGHT:

The Black audience has the highest level of viewing engagement based on total watch time.

Key Insights

KEY INSIGHTS

- Bright TV recorded approximately 10K total views.
- The platform recorded 4,386 total viewers.
- Total watch time was 1,340.
- Bright TV has 17 TV channels represented in the dashboard.
- Young Adults recorded the highest viewership among the age groups.
- Evening recorded the highest viewership by time of day.
- Viewership varies across TV channels and geographic regions.
- Monthly viewership increased toward March before declining in April.

Recommendations

RECOMMENDATIONS

- **Schedule popular and high-value content during evening hours when viewership is highest.**
- **Develop content and marketing strategies that target the strong Young Adult audience.**
- **Investigate the highest-performing TV channels to understand what drives their strong viewership.**
- **Focus marketing efforts on regions with growth opportunities.**
- **Continue monitoring monthly viewership trends to identify changes in audience behaviour.**
- **Use audience insights to support future programming and content decisions.**

Conclusions

CONCLUSION

The Bright TV Viewership Analysis dashboard provides a clear overview of audience demographics, channel performance, geographic distribution and viewing behaviour.

The analysis transforms viewership data into meaningful insights that can support better programming, audience targeting and engagement decisions.

THANK YOU
